

# Deliver your upgrade project 25% quicker

The key to a successful upgrade to your SAP system is completing the project in the shortest possible time, with minimal disruption or risk to the business.

Find out how Experior testing services can help.

“Over 86% of senior IT executives are concerned about the risks associated with change due to a lack of comprehensive testing.”

Americas’ SAP Users’ Group

### Save 50% of your testing costs

The importance of testing cannot be underestimated. It is a crucial factor in reducing project risk and ensuring that the business achieves the full benefit from your SAP upgrade. But it can also be a complex and lengthy process, taking up to 75% of project time. So how do you balance the need for effective testing with the demands of the business in completing your upgrade on schedule?

Experior has the answer.

Our unique testing methodology can accelerate your upgrade by up to 25% by focusing testing efforts on those areas that will maximise the benefit to the business while minimising risk. A proven and repeatable approach, it utilises low maintenance test assets that can be used again and again – cutting your testing costs by up to 50%, and providing a clear audit trail of which elements of the system have been tested.

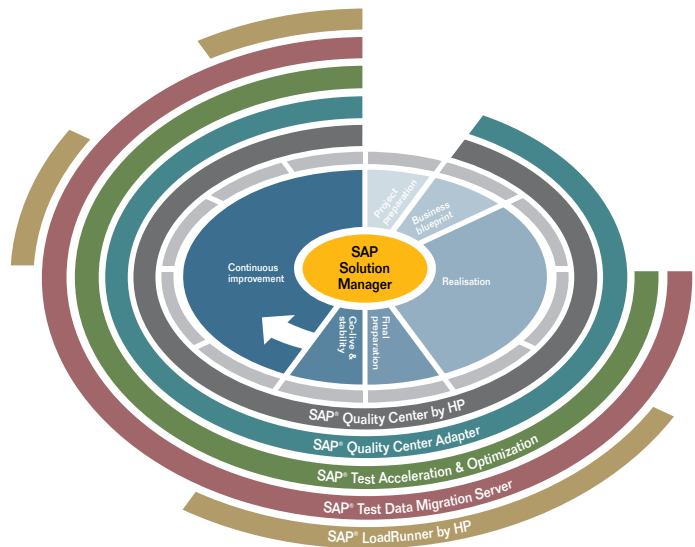

To accelerate your upgrade project and go live with confidence, speak to Experior today.

“Experior provided a new approach to testing that enabled us to successfully accelerate the timelines for our upgrade.”
